

MEMORANDUM OF AGREEMENT
BETWEEN
BECHTEL HANFORD, INC.
AND
FLUOR DANIEL HANFORD

I. PURPOSE AND SCOPE

This Memorandum of Agreement (MOA) sets forth the responsibilities and agreements between Bechtel Hanford, Inc. (BHI) and Fluor Daniel Hanford (FDH) and its Major Subcontractors (MSC) (individually, the "Contractor," and collectively, the "Contractors") for the maintenance of the Waste Identification Data System (WIDS) database administered by BHI. FDH executes this MOA on behalf of itself and its MSCs.

Nothing within this MOA shall be construed to create a contract between BHI and FDH or its MSCs. All acts and actions of BHI and FDH shall be considered as being taken pursuant to each of their respective contracts with the U.S. Department of Energy (DOE), Richland Operations Office (RL).

It is not the intention or understanding of the Contractors that this Agreement be binding on DOE-RL. In the MOA provisions where actions by DOE-RL are indicated, it is the understanding of the Contractors that these actions are current DOE-RL practice.

Following RL Programmatic assignments for new waste site assignments and/or reassignments, this MOA describes the process utilized by BHI and FDH for assignment or transfer of management responsibility of waste sites or changes in information applicable to a waste site as identified within the WIDS database.

This MOA establishes individual points of contact, Jim Golden for FDH and Linda Dietz for BHI, to whom authority is given by FDH and BHI, respectively, to reach agreement and make management decisions. Management decisions or agreements shall not include decisions affecting transfer of sites between Contractors and/or transition requirements for such proposed transfers.

II. AGREEMENT

1. The process for new waste site assignments in WIDS is described as follows:

- a. RL Programmatic and preliminary Contractor assignments shall be made for new sites in accordance with RL (CCN 049471), Memorandum on the Agreement of Programmatic Responsibilities for Hanford Waste Sites. RL and each RL prime contractor shall review site data (e.g., classifications, DOE programmatic and contractor assignments) to provide advisory support, as appropriate.
 - b. The RL Assistant Managers shall confirm programmatic assignments made in paragraph a. above. Following confirmation of the RL Assistant Managers, the BHI WIDS Database Administrator shall enter the RL program assignment into WIDS. The contractor field/flag shall be set to "No".
 - c. RL shall provide written contracting officer direction to each of the affected prime contractors notifying the contractor of the waste site assignments. Once the prime contractor has received written direction, the prime contractor shall inform the BHI WIDS Database Administrator and the contractor field/flag shall be set to "Yes".
 - d. Following contracting officer direction, the Contractors shall complete a Baseline Change Request/Proposal for the scope and/or cost change attributable to new site assignments OR shall provide written notification to RL of a problem complying with the contracting officer letter of direction. A courtesy copy of any such notification letter to RL shall be provided to the BHI WIDS Database Administrator.
2. Following the initial assignment by RL, the process for transferring waste sites between RL Program Offices and Contractors is described as follows:
- a. Waste sites proposed for transfer between Contractors must meet transition requirements (acceptance criteria and specific end point criteria) specified by the contractor proposed to receive the waste site(s). The transferring and receiving RL Program offices must concur in the proposed transfer of a waste site(s) before the Contractors initiate transition criteria.
 - b. After completion of the transition requirements, the RL Assistant Managers shall complete a memorandum of agreement agreeing to the programmatic transfer of the waste site(s).
 - c. After completion of the RL memorandum of agreement, RL shall send a contracting officer letter of direction to the each of the

0'72583

affected contractors notifying of them of the waste site assignment(s).

- d. The Contractors shall notify the BHI WIDS Database Administrator of receipt of the letter of direction. The BHI WIDS Database Administrator shall change the programmatic assignment and the contractor field/flag designation to reflect the change in management responsibility.

- 3. Data changes pertaining to waste sites in WIDS assigned to FDH and its MSCs shall occur as follows:

- a. Within 5 days of the data change in WIDS, the BHI WIDS Database Administrator will notify the FDH and/or its MSC point of contact of changes in information relating to FDH waste sites. E-mail notification is preferred.
